

ELLINGSON ANGUS

Real-World Genetics

2024 ANNUAL PRODUCTION SALE

12 pm CT • Saturday, Feb. 3, 2024 At the Ranch • St. Anthony, ND

Maternal Function. Optimized Growth. Customer Service.

1,158 Head Sell!

Welcome!

I invite you to our annual production sale on Saturday, Feb. 3, or any time prior that is convenient for you. Our ranch is open to everyone to check out the bull offering and the cowherd responsible for it. We enjoy the time we can spend with our current and future customers reviewing cattle genetics and what best suits each of your operations.

The sale offers a large volume of bulls comprised of large sire groups of half and full brothers. More than half the offering is the direct result of our embryo transplant program. We transplanted more than 600 embryos in 2023 in an ongoing commitment to produce large volumes of bulls out of the top 5 percent of our cowherd. By doing this, we can offer elite, affordable genetics in volume for commercial cattle producers. Not only does this allow us to offer a very uniform set of bulls from the first to the last one in the ring, but, more importantly, it allows you to turn out multiple closely related bulls for a consistent and valuable calfcrop.

We lead off the sale offering with the first sons of Ellingson Prolific, our ranch's high-selling bull from two years ago that sold to ST Genetics. He has become one of the most popular bulls in America. His anticipated breeding potency is being quantified by his first calfcrop. His sons are deep, powerful and structurally right. His dam, EA Queen 8070, has been a favorite by those who've seen her. We are excited for you to see his first sons. Our largest volume of sons in the offering are out of Ellingson Badlands 0285. His first sons that sold in 2023 launched him to become one of the heavier used bulls of the breed last spring. His ability to sire calving ease with phenotype and maternal stability may be unmatched. We are excited to offer 68 direct sons in this sale. Our confidence in this sire is unwavering, as we will have 250 more of his calves born here this year.

Summer and Fall 2023 brought the highest feeder calf prices the industry has ever witnessed. It was rewarding to see many of our customers reap large returns on the genetic investments they've made over the years. Some of the best days of the year are when we can be alongside our customers on their marketing day. Ellingson Angus has built a strong reputation for quality and performance in the feeding industry. Our customers are finding that, no matter if they market their cattle direct, at the sale barn or on video, it pays to have the Ellingson Angus brand associated with your cattle.

While performance and carcass genetics are extremely important, we realize the beef industry starts with a strong maternal factory at the ranch level. Having cows that wean a large calf every 365 days without a lot of extra care is of the utmost importance to ranchers' profitability. That is why Ellingson Angus continues to collect every aspect of maternal data we can. We think fertility data, foot data and culling data are critical measurements essential in identifying and producing the best maternal genetics. While we strive to produce fat, beautiful, maternal matrons, we know she is only a maternal matron if she also is producing as one. As you review our offering, you will see we emphasize foot traits, heifer pregnancy and \$M – traits that make a profitable contribution for our customers.

We work to produce the best genetics not only for the future of our operation, but yours and, ultimately, the beef industry. We know that a lot hinges on our decisions. Therefore, we will never take shortcuts in genetic selections. We will evaluate each animal phenotypically, collect all the data, collect and turn in DNA and, ultimately, find the ones to mass multiply and the ones to cull. As your genetic supplier, we'll work to make your tomorrow better than today.

Sincerely,

Chad Ellingson

Ellingson Angus

ANNUAL PRODUCTION SALE

Saturday, Feb. 3, 2024

NEW EARLIER TIMES: Lunch at 11 a.m. CT • Sale at 12 p.m. CT • At the Ranch • St. Anthony, ND

Sale-Day Phones

Office: (701) 445-7309 or (701) 445-7300
Chad's cell: (701) 361-3606 • Julie's cell: (701) 214-7709
Stetson's cell: (701) 595-1364 • Jameson's cell: (701) 226-8645

Sale Location

The sale will be held at our ranch sale facility near St. Anthony, N.D., located approximately 30 miles from Bismarck/Mandan, N.D. From Mandan, go 19 miles south on Highway 6 until County Road 135. There, turn left (east) and follow the gravel road for 5 miles to the ranch and sale site.

Lodging

A block of rooms has been reserved at the Comfort Inn & Suites in Mandan for \$112 plus tax. To make reservations, call (701) 751-7484 by Jan. 19.

Guarantee

The cattle are guaranteed to be fertile and reproductively sound. All bulls selling come with a first-year breeding-season guarantee against injury or infertility issues. "Breeding season" is defined by the time of turnout to 60 days later. **All bulls will have passed a semen evaluation before being delivered.** If any fertility problems happen during the first breeding season, a replacement bull will be available until the purchased bull's long-term fertility can be determined. If a bull sustains a breeding injury during the first breeding season, a credit on a future bull purchase will be given. If a bull sustains an injury or fertility issue, we ask that it is evaluated and treated immediately by a veterinarian and a report is provided by the veterinarian doing the evaluation. If the vet determines the bull is no longer a fertile and mobile breeder, the following formula will be used to determine credit issued on a future purchase: purchase price - salvage value - \$2,500 (if injury related) = credit.

Terms of Sale

Settlement is to be made on sale day. Cattle will not be released until payment is received. All registered animals will be transferred. One-hundred percent revenue-sharing interest is being sold on all bulls with only within-herd semen use being retained.

Volume Discounts

We are offering discounts on volume purchases of bulls. Save 5 percent on five bulls, 10 percent on 10 bulls and 15 percent on 15 bulls.

Photographs

The pictures of the 2024 offering in this catalog were taken in November.

Genetic Information

All registered lots have had an HD 50K test, and the EPDs listed reflect the 50K enhancement. The test verifies parentage and increases predictability. Complete 50K results of the sale offering can be accessed upon request. All animals are tested free of any known genetic defect.

Performance Data

The performance data, except for the 365-day weights, has been calculated through the Angus Herd Improvement Records (AHIR) program. These are official numbers from the Sire Summary. At press time, most of the bulls didn't fit the age parameters to process adjusted yearling weights through AHIR. Projected yearling weights noted were calculated using the American Angus Association's yearling weight formula.

Health

Dr. Pat Bierman will be on hand to write health certificates for those requiring them. All cattle have had a complete vaccination program.

Delivery

We are offering free delivery on all bulls to central points in the United States and to Canadian points of entry. For all females, we will help coordinate delivery to get the cattle to you as economically as we can.

Feeding Arrangements for Bulls at No Charge

We are offering free keep on bulls until April 1. If you take your bull home within three days of the sale, we will give you \$100 off.

Reference Sire: *Prolific*

Ellingson Prolific

Ellingson Profound 8155

EA Queen 8070

S Powerpoint WS 5503
EA Rosetta 6157
Koupal Juneau 797
EA Queen 2350

We are excited to present the highly anticipated first offering from Prolific. He has taken the industry by storm as one of the most heavily utilized Angus sires last year. We look forward to many more progeny being born here this spring.

His sons' natural base width, muscling, rib capacity, softness and overall pounds will impress you. You will also appreciate the foot quality Prolific looks to be stamping into them consistently.

Still, nothing leaves us more excited than Prolific's potential influence from the maternal excellence that anchors his pedigree. His Pathfinder donor dam is among the most elite on the ranch. She gives us confidence that the Prolific daughters will be sound, easy keeping, fertile and productive.

Prolific is owned with ST Genetics.

Left: EA Queen 8070, the Pathfinder donor dam of Ellingson Prolific.

We could not be more thrilled than to start off the 2024 Ellingson Angus Sale with a pair of brothers that encapsulate the fundamental components of what our breeding program strives to produce. Their phenotypic and genotypic dominance represent the thrilling possibilities of what their young sire has the capability to bring to the beef industry. These two individuals offer immeasurable potential. Their Pathfinder donor dam posts a stellar production record, with a production birth ratio of 6/100, a nursing ratio of 6/109, a yearling ratio of 2/114, a ribeye ratio of 2/103 and a 367-day calving interval, all while being flushed. Her outcross, yet time-tested, pedigree combines two maternal greats in Thunder and Territory. They are maternal brothers to the \$90,000 second-top-selling bull in our 2023 sale, Ellingson Navigator, that sold to Katus X7 Ranch and Beran Brothers. No matter how far the journey, these brothers alone are worth the trip to St. Anthony on Feb. 3. Lots 1 and 2 are flush brothers.

Lot 3 is a wide-based Prolific son that has been a standout since birth. He came off his dam at an actual weight of 965 pounds and earned a 117 weaning ratio. His genomic profile ranks him amongst the best of the breed for weaning and yearling growth, scrotal circumference, heifer pregnancy, maternal calving-ease and foot quality. His dam has recorded a nursing ratio of 2/112 and settled to first-service A.I. every year of her production career. Like our other Rider Pride daughters, she is easy fleshing and has a picture-perfect udder. A maternal sister is retained in our bred heifer pen and is due for an early A.I. calf.

The Prolific x Rider Pride combination has proven to be a huge success and is tailor made for commercial cattle producers that expect their cowherd to work for a living. You will appreciate the added volume, depth of flank and base width built into Lot 4's conformation. Stacking together some of the most problem-free sires we have ever utilized, this bull has Prolific, Rider Pride, Boardwalk, Traveler 004, Alliance 6595 and EXT all within his immediate lineage. His genomic profile ranks him among the elite in the population for weaning and yearling growth, scrotal circumference, claw and angle, heifer pregnancy, maternal calving-ease, carcass weight and ribeye area. With all that said, he is truly an individual that can add value to all segments of the beef industry. He is double-bred to the iconic EA Pride 346 donor dam that is best known as the mother of the \$28,000 Ellingson Boardwalk 3032.

The Prolific sons, much like the Profound, are built for commercial ranches that operate in challenging environments, yet still have a high expectation for their cowherd to be easy fleshing, breed back and raise large calves. Based on his flawless structural design and added muscle density and rib capacity, Lot 14 is built for the long run. His dam has the conformation to flesh easy even in times of scarcity, near-perfect udder design and teat size and has settled to first-service A.I. each year of her production career. His two maternal sisters have been retained in our cowherd.

Lot 15 is one of our favorite Prolific sons of the offering. When you see him in person and study his data, he is hard to put a hole in – the kind of sire prospect that offers positives to any breeding program. His dam has a production nursing ratio of 2/107, a yearling ratio of 1/106, an IMF ratio of 1/136, a ribeye ratio of 1/107 and a 365-day calving interval. His dam is one you can appreciate for her structural integrity, fleshing ability, softness and wedge design. His grandmother is a second-generation Pathfinder and has a nursing ratio of 4/110. She and Lot 15 were visitor favorites last summer.

CLAW: +.27 ANGLE: +.29

Lot 16 ties together two of the most sought-after herdsires ever produced at our ranch, Prolific and Three Rivers. His impressive, bulging crest, masculinity, added substance and natural dimension give him the look of a herdbull. He stays true to our goal of producing explosive early-growth cattle that mature into modest-sized animals. He ranks in the top 15 percent for weaning and yearling growth and the bottom 25 percent for mature size. His young dam has already posted a nursing ratio of 2/112 and settled with her third early-born calf due this spring. Her angularity, fleshing ease and structure replicate that of her mother, a productive contributor of this cowherd at age 11.

Lot 15, Ellingson Prolific 3215.

Lot 16, Ellingson Prolific 3404.

Left: Ellingson Uncharted, the high-selling Badlands son in our 2023 sale to U2 Ranch.

Badlands is one of the most exciting Angus sires to have come around in many years. His balanced-trait package gives him the correct tools to make a meaningful impact in the cattle industry.

Badlands has proven to be a reliable calving-ease sire after large proofs in both the commercial and purebred sectors. His sons have added base width and volume, structurally sound packages and authentic breed character.

His Pathfinder dam continues to reach uncharted heights of success. As an outlier for combined maternal and performance excellence, she now has numerous sons being utilized via A.I.

Badlands will continue to play a major role in our breeding program for years to come. He is owned with Katus X7 Ranch and B&D Angus and Herefords.

CLAW: +29 ANGLE: +24

Ellingson Badlands 3185 is one of many in his sire group that should be suitable for use on virgin heifers. His 2-year-old dam is a beautifully constructed female with added fleshing ability, femininity and a picture perfect udder. She is due with an early A.I. calf for this spring and is a maternal sister to the \$65,000 Ellingson Turn Key 0170 and \$20,000 Ellingson Bold, both of which are A.I. sires for our breeding program. His donor granddam ranks as one of the most productive and fertile females on our ranch and never fails to be a visitor favorite for her front-pasture maternal design.

EA Miss Blackbird 5054, the maternal granddam of Lot 37.

Dam's Nursing Ratio: 1/109 HP: +8.8 \$M: +48

CLAW: +32 ANGLE: +33

Lot 38's genomic profile ranks him amongst the elite of the breed for weaning and yearling weight, scrotal circumference, foot quality, milk production, carcass weight and rib-eye area. Following in the footsteps of her Advance mother, his dam looks to be easy maintaining with strong udder suspension and small teat size. She is bred to have an early A.I. calf this spring. His granddam is a maternal sister to the \$50,000 EA Emblynette 6279 donor, best known as the dam of Ellingson Three Rivers 8062.

EA Madame Pride 3295, the maternal granddam of Lots 40 and 41.

Creating a consistent, predictable product in volume is our highest priority when making mating decisions. We understand that is the largest driver of profitability for a commercial ranch. Having the opportunity to purchase full sibs to turn out together gets a program one step closer to creating a more consistent calfcrop. Take advantage of that here, as this bull is a full brother in blood to Lot 40.

Badlands is developing a legacy for siring sons that have unmatched eye appeal, structural integrity and shear power. This standout herdsire candidate could be the poster child for that. He came off his dam at 910 pounds to earn a weaning ratio of 105. His powerhouse Chaps dam is a beacon for production and breed-back ability. She has no problem maintaining her flesh throughout even the leanest times of the year and is one you are impressed by each time you see her in person. A full brother was the \$12,000 selection of Jeb Fredericks in last year's sale, while maternal brothers are working for Steptoe Ranch and Prairie Diamond Ranch.

Ellingson Badlands 2818 displays exceptional Angus breed character like his sire with exceptional structural correctness. His low birthweight EPD and double-digit CED validate him as a safe option for virgin heifers. Just like all the long-age bulls, he was born unassisted in a large pasture setting, far away from our headquarters. Because of that, added expectation is put upon those fall-calving dams – even first-calvers, like this bull's mother – to handle business on their own, since they are infrequently checked.

Ellingson Badlands 2714 is a top-shelf prospect straight from our fall ET herd. He is not hard to find when you walk into the pen. He is a stockman's kind of bull that travels with a proud, athletic stride. He puts together the best in performance and maternal genetics to cater to cow-calf operators. His dam is a full sister to Ellingson Three Rivers 8062, the \$100,000 Alta Genetics sire. A maternal brother was selected by Ham Ranch in last year's offering. Checking back with Brady this fall, he reported that he is one of the most impressive individuals he has owned.

Ham Ranch purchased a maternal brother to Lot 60 in the 2023 Ellingson Angus Real-World Genetics Production Sale. Pictured are Kristen and Burke Ham.

EA Queen 8070, the dam of Lot 61.

Dam's Nursing Ratio: 3/100 HP: +16.1 \$M: +82

CLAW: +.45 ANGLE: +.40

This performance-driven Badlands son came off his dam at an actual weight of 905 pounds and earned a weaning ratio of 106. His depth of body and stout-muscled makeup will lend well for his staying power to service a volume of females for years to come. His dam is a maternal sister to the Pathfinder dam of the Genex CRI sire Ellingson Rush, whose sons are being offered in this sale. A full brother was the \$18,500 selection of Buford Ranches in last year's sale.

We invite you to come preview the bulls and their mothers.

Ellingson Badlands 3198 has a negative birthweight EPD and a double-digit CED. You can utilize him with confidence on virgin heifers. His grandmother achieved Pathfinder status.

Reference Sire: *Rangeland*

In accordance with his name, the Rangeland cattle have the body type and structural integrity to thrive in the real world, where cattle have to work for a living – the rangelands of America.

Expect the Rangeland sons to improve overall maternal, foot and udder quality, fertility and production ability with an ample level of performance.

The Rangeland females are some of our very best young females. Like his beautiful mother, they are wedge shaped with strong Angus breed character. They have continued to show they possess excellent fertility. As more raw data has come in, the better his heifer pregnancy EPD continues to get.

The first daughters in production have a 101 combined nursing ratio.

Rangeland is owned with ST Genetics.

Left: Ellingson Hi-Range, a Rangeland son that was the \$160,000 purchase of Hamilton Farms and MWC Investments in 2022.

This trio of ET brothers is slated to be a highlight of the sale. They are full brothers to the \$160,000 second-top-selling bull of our 2022 production sale, Ellingson Hi-Range, owned in conjunction with Hamilton Farms and MWC Investments. The first Hi-Range progeny in Canada have garnered rave reviews from even the most scrutinizing cattlemen and women. Some daughters have already highlighted national Canadian sales, including one that sold for \$50,000 at the Agribition. This flush offers the same elite-caliber phenotype and data set that have made their brother a sensation. Their outcross, yet proven, pedigree offers unlimited mating potential. Their donor dam has recorded a production birth ratio of 3/90, a nursing ratio of 3/107 and a yearling ratio of 1/105. She will play a major role in our breeding program moving forward with many ET progeny due this spring. **Lots 94-96 are flush brothers.**

Lot 97 epitomizes what common-sense practicality in beef production should look like. The more you study him in the flesh and on paper, the more you come to appreciate him. His genetic profile ranks him among the best of the Angus population for weaning weight, foot quality, PAP, heifer pregnancy, maternal calving-ease and carcass weight. He is smooth profiling and sharp fronted, yet is still an individual you can easily see lots of natural dimension in. His dam is a three-quarter sister to the \$175,000 Ellingson Prolific at ST Genetics. She is elegant in her design with added fleshing ability and a near-perfect udder. His dam is a full sister to a \$27,500 feature in 2022 that sold to Skull Creek Ranches. Other full and maternal brothers to her are working for Gordon Benson, Landon Davis, Whitewater Cattle Company, Elk Meadows Ranch, Michael Nathe, Lower Brule Ranch, Penhros Farms and Buford Ranches, which has two.

CLAW: +.39 ANGLE: +.28

Being royally bred by stacking together Rangeland with one of the best females of the entire Angus breed, Ellingson Rangeland 3593 offers maternal excellence at its finest. His Pathfinder dam by Koupal Advance 28 needs no introduction to anyone familiar with our breeding program. She has a long history here, recording a production birth ratio of 5/100, a nursing ratio of 5/106, a yearling ratio of 3/110, an IMF ratio of 11/110 and a ribeye ratio of 11/104. She has settled to first-service A.I. every year of her production career thus far.

Ellingson Aquifer 9137, the sire of Lots 106 and 107.

Ellingson Rush, a maternal brother to the dam of Lot 107.

Ellingson Aquifer 2964 is one of the softest sided and deepest flanked bulls of this year's sale offering. He traces twice to Ellingson Roughrider 4202, a popular sire amongst progressive commercial ranchers. His Blackbird dam is a maternal sister to the Genex CRI sire Ellingson Rush that has seen heavy usage in large commercial-heifer A.I. projects throughout the country. EA Blackbird 9325 is anchored by three consecutive generations of productive Pathfinder dams.

We are thankful for all the family and friends who help us host our sale. It takes a village, and these are some pretty amazing "village people." Here is part of the crew ahead of last year's sale. Pictured (L to R) are Wyatt Dakken, Bill Geiser, Jake Goldade, Courtney Maier, Seth Jacobs, Jonathan Marohl, Brendin Monge, Ross Olson, Sebastian Jacobs (seated, holding A.J. Jacobs), Shane Vollmer, Kaleb Neshem, Juwan Speed, Jacob Ellingson, Morgan Hedstrom and Keenan Pierce.

Now a proven sire, Barricade has made a positive contribution to our breeding program and, more importantly, our customers' programs. The body mass, center rib, base width and power in the Barricade cattle certainly make him appropriately named. He sires consistency, which you will see from his first to last son.

The Barricade progeny follow the same type and kind as another Ellingson-bred Genex CRI member, Ellingson Roughrider 4202.

His pedigree is anchored by two cornerstone sires responsible for some of the top females in our program, Benfield Substance 8506 and LT Territory 5824 of EA.

His influence will continue to be offered for years to come, as his son, Brickhouse, has become integral in our breeding program.

Left: Ellingson Brickhouse, the third-high-selling bull in our 2022 sale and a son of Sitz Barricade 632F.

Leading off a sire group that has been extremely popular amongst our commercial clientele over the past few years, this bull is an absolute meat wagon. He came off his dam at an actual weight of 1,075 pounds and hasn't looked back since. His unique blending of power and strongly anchored maternal values make him a strong candidate to drive a program into the future. His Pathfinder donor dam by Koupal Juneau 797 has recorded a production birth ratio of 5/96, a nursing ratio of 5/107, a yearling ratio of 3/103 and a ribeye ratio of 1/111 and settled to first-service A.I. every year of her production career thus far. She has impeccable foot design and soundness paired with elegant femininity and maternal softness. She earned her spot on the donor roster the old-fashioned way – through superior production and fertility. His maternal brother was Lot 2 and the \$22,000 feature of our 2022 production sale. Sixteen full and maternal sisters have been retained in our own cowherd.

Lot 108, Ellingson Barricade 3009.

We welcome you on sale day or any time leading up to it. For those who are unable to be in the stands Feb. 3, but who would like to participate in the auction, the sale will be carried by DVAuction and Northern Video.

Shawn Hinsz (second from right) owns a maternal brother to Lot 109.

This big-middled, husky-made Barricade son ties together dominant genes of maternal, performance and carcass merits. His Pathfinder donor granddam boasts a production birth ratio of 8/97, a nursing ratio of 8/103 and a yearling ratio of 7/104 and has left an influential mark on our herd. A maternal brother was the \$15,000 selection of Ken and Mary Schmidt in last year's offering.

CLAW: +.38 ANGLE: +.31

Lot 125 is in a performance class of his own, tying together two of the most pounds-heavy lines we have ever utilized, with Barricade as his sire and a full sister to Three Rivers as his dam. He has the ability to power-boost meek, fragile-made females in dramatic fashion and possesses as much substance of bone and muscle density as any in the offering. A maternal brother was selected by Ham Ranch in last year's sale.

EA Miss Blackbird 5054 Koupal Advance 28
EA Miss Blackbird 3223

Turn Key was the lead-off and high-selling Three Rivers son in our 2021 sale. He is a once-in-a-generation breeding piece. His level of stoutness and shear power is rarely found in Angus sires available today.

His sons were well-accepted by commercial ranchers in last year's sale and were the high-averaging sire group. Expect his sons to transmit explosive early growth, like the Three Rivers are known for, but in a more disciplined frame size.

His dam is one of the marquee donors on our ranch, excelling in foot and udder quality, fertility and phenotypic balance. Her excellence continues even as she ages, which makes us extra excited for his daughters.

Turn Key is owned with DBL Inc., Spinelli Angus and Premier Genetics.

Left: Ellingson Navigator, a Turn Key son that was a \$90,000 bull in our 2023 sale.

The Turn Key sons were the highest averaging sire group in last year's sale, embraced by both the commercial and purebred sectors alike. We can think of no more fitting way to lead this year's set of Turn Keys off than with what may be his best son to date. You will appreciate the masculinity and overall correctness Lot 135 exhibits in person. The cow power that backs him up is second to none, with seven of the first eight dams of his maternal lineage having reached the pinnacle of Pathfinder status. His dam has recorded a production nursing ratio of 5/109, a yearling ratio of 4/104, a ribeye ratio of 2/111 and a 362-day calving interval, having settled to first-service A.I. every year of her production history so far. She is a maternal sister to the \$50,000 co-top-selling bull of our 2016 production sale, Ellingson Top Shelf 5050, who went on to make positive contributions for Hoffman Ranch and Semex Beef. His maternal brothers have also highlighted past sale offerings, selling to Rodney Schatz and Ottmar Ranch.

Lots 146-152 are seven flush brothers that present exciting potential for those needing to cover a volume of females. They are robust in their muscle pattern, square made and optimally sized. Their sire was always actively pursuing females to service in our breeding pasture, and we expect the same libido and enthusiasm from these long-age sons. Their donor dam is the best Resource daughter on our ranch, with added angularity to match up with her softness and superb foot and udder quality. She is a maternal sister to the \$25,000 Ellingson Identity 9104 and carries forward many of the qualities of her EXT 6106 donor dam. A maternal brother by Profound is an impressive herdsire for the Jay and Salena Gullickson family, and his influence will be represented in the potload of females they are offering in this sale. Lots 146-152 are flush brothers.

We look forward to seeing customers and friends on Feb. 3. Please note that the sale will begin at 12 p.m. this year.

Steer calves with a larger outline and extra length of body will often create greater feedlot demand. Ellingson Turn Key 3549 will help you achieve those outcomes. His Pathfinder dam has recorded a production nursing ratio of 7/102, a yearling ratio of 4/101 and a ribeye ratio of 3/104. Maternal brothers are working for Diamond Cross Ranch and Allen and Lisa Howard.

EA Evergreen 7832, the great-granddam of Lot 154.

Ellingson Turn Key 3624 is another expressively muscled son of Turn Key that is long spined and optimal in frame – a perfect phenotypic type to achieve profitable feeder calves and create long-lasting females. A maternal sister is retained in our bred heifer pen and due to calve with an early A.I. calf. His granddam is now serving as a donor dam for Roussels at 12 Star Ranch.

Allen Howard

Correct foot structure starts with cattle that are designed with appropriate angles and symmetrics throughout their conformation. Being level-topped is a key component of that, and Lot 157 exemplifies it. His genomic profile ranks him among the best of the breed for weaning and yearling weight, foot quality, hair shedding, heifer pregnancy, maternal calving-ease, carcass weight and ribeye area.

Ellingson Chaps 4095

EA Emblynette 2159

Three Rivers has become the go-to performance sire of the breed. One of the unique breeding tools of recent times, there are few to no comparable Angus sires available today. Improving skeletal size, length of body, pounds, substance and muscle density in a one-generation mating is not typically found, but is consistently accomplished with Three Rivers.

His performance EPDs have stayed as strong as they were after the first progeny data set was turned in – a testament to his genetic potency.

His dam has become a cornerstone of the Ingram and Beartooth programs after she was the \$50,000 top-selling female at the 2022 Angus at the Congress Sale. His first daughters are profitable contributors.

Three Rivers is owned with Ham Ranch, Boettcher Angus and Alta Genetics.

This trio of long-aged flush ET brothers comes from the proven blending of Three Rivers and Advance, which is responsible for the production of countless herdsires, including Turn Key, Deep River and Big River, to name a few. A maternal sister, EA Blackclass 8207, is a part of our donor pen and has already produced numerous highlight sons, including the \$20,000 Ellingson Fullback 1832 that is owned by Simenson Land and Cattle and was utilized this past spring breeding season in our registered cowherd. Maternal brothers have been selected in past offerings by Van Zee Cattle Company, Kenny Gesinger and Dick Woodbury, while a full brother was the \$16,000 selection of Amstutz Cattle Company in 2022. Lots 177-179 are flush brothers.

These five flush brothers are full siblings to the \$65,000 lead-off and second-high-selling bull of our 2021 sale, Ellingson Turn Key 0170. Their donor dam would hold a spot on the "Mount Rushmore" of females to have ever lived at our ranch. Coming into her ninth year, she is as sound and fertile as ever, with no signs of age or slowing down. Maternal brothers are working for Diede Ranch, Ken and Mary Schmidt, Casey and Kyle Wells, Diamond Cross Ranch, Waltman Angus, Elk Meadows Ranch, Tom Kaspari, Casey Schlosser, Landon Davis, Bates Creek Cattle Company, Drew and Callie Johnson and Ottmar Ranch. Full brothers are working for Drew and Callie Johnson, Ham Ranch and Buford Ranches. A full sister was the \$25,000 "pick of the heifer calves" in 2021, purchased by Eagle Grip Cattle and Abernathy Ranches. She has went on to earn donor status. Another full sister, EA Miss Blackbird 0018, is being flushed aggressively here. A maternal brother was a \$20,000 purchase in last year's sale by Murray Angus and was utilized aggressively here, with the first calves to come in Spring 2024. **Lots 180-184 are flush brothers.**

Lot 185 is an optimally sized, dense-muscled bull out of one of the premier donor females on the ranch. She is a flush sister to EA Bells Girl 7617, best known as the mother of Badlands, Brickhouse and Preeminent. Maternal brothers are working for Jerry Schmidt, Diamond Cross Ranch, Ivan Johnson, Lower Brule Ranch, Sheldon Holte and Paintrock Angus. Another maternal brother, Ellingson Statement, was the \$70,000 third-top-selling bull in last year's sale. He sold to Little Goose Ranch and Mike and Dottie Barnes. Statement is being utilized via A.I. and natural service back in our program, and his first progeny will be featured as a part of next year's sale.

These five flush brothers exhibit performance genetics at their finest. They are alike in their kind from the first to the last. The genetic potential they offer to those who sell their calves by the pound is second to none, as they are on a fast track to selling market-topping feeder cattle. Their Pathfinder donor dam has a production birth ratio of 5/96, a nursing ratio of 5/107, a yearling ratio of 3/103 and a ribeye ratio of 1/111 and settled to first-service A.I. every year of her production career. She has impeccable foot design, soundness, elegant femininity and maternal softness. She earned her spot on the donor roster through superior production and fertility. Their maternal brother was Lot 2 and the \$22,000 feature of our 2022 sale. Sixteen full and maternal sisters have been retained in our cowherd, including a full sister that is the dam of some of the featured lots in this sale. **Lots 191-195 are flush brothers.**

CLAW: +29 ANGLE: +26

Ellingson Three Rivers 3058 has been in a performance class of his own. His added size, length of body, substance and natural thickness will lend kindly in siring calves that will weigh heavy in the fall and have an appetite for gain in the feedlot. His second-generation Pathfinder dam has recorded a production nursing ratio of 4/110, a yearling ratio of 2/110, an IMF ratio of 2/109 and a 364-day calving interval. She is slated to earn the Pathfinder award again in only her second year of being eligible. She earned a spot on our donor roster this past spring. His maternal brother, Ellingson Profound 2125, was a \$22,000 feature in last year's sale, selling to Lindskov's LT Ranch. After covering cows throughout the summer and holding his condition very well, he has been collected and included in their fall program via A.I. Another maternal brother is working for Gottsch Cattle Company.

Lot 197's genomic profile ranks him amongst the best of the Angus population for weaning and yearling weight, scrotal circumference, foot quality, heifer pregnancy, carcass weight, ribeye area and tenderness. His maternal brothers are working for Diede Ranch, Prairie Diamond Ranch and Gary and Shane Siverson. Ellingson Three Rivers 3370 is a three-quarter brother to Lots 191-196.

Ellingson Profound 2125, a maternal brother to Lot 196.

EA Blackclass 8306, the dam of Lot 196.

Diede Ranch (left) and Prairie Diamond Ranch are among those who have selected maternal brothers to Lot 197.

EA Emblynette 9311, the dam of Lot 198.

This long-age Three Rivers son has been a leader of the pack for performance, garnering a weaning ratio of 117 and a yearling ratio of 110. His impressive dam has posted a production nursing ratio of 2/112, a yearling ratio of 2/106 and an IMF ratio of 2/146. She may very well be the most eye-appealing female on the ranch. She has elegant femininity throughout, softness of rib and superb udder and foot quality. Maternal brothers have been selected in past sales by Steve and Kim Bruski and Gordon Benson. Other maternal brothers sired by Turn Key are featured in this sale as Lots 136-138.

Masculine, big-topped bulls are the kind we aim to produce, and you will find that in Lot 199. His dam is a smaller statured female that is soft in her body type and has a picture-perfect udder. His Pathfinder granddam was a long-time donor recording a nursing ratio of 8/104 and with a multitude of daughters at work in our cowherd today. His full sister is a big-barreled bred heifer retained in our bred heifer pen and due to calve with an early A.I. calf.

Lot 202 is one of our favorite Three Rivers sons in the whole sale. He weaned off his dam at an actual weight of 910 pounds to capture a weaning ratio of 107. His dam by Secretary has recorded a production nursing ratio of 6/104, a yearling ratio of 4/101, an IMF ratio of 3/117 and a ribeye ratio of 3/101. His granddam was an active producer into her teens and has a nursing ratio of 11/104. A maternal brother was the \$19,000 selection of Northway Cattle Company in our 2020 production sale.

EA Emblynette 2015, the dam of Lots 203-207 and granddam of Lot 208.

EA Emblynette 5365, the maternal sister to Lots 203-207 and the dam of Lot 208.

Do not overlook this bull because of his age. He has kept pace with his older contemporaries. Like his sire, Lot 212 will move the needle forward for all things performance, which is how most of us in the cow-calf industry are paid. Maternal brothers have been selected in past sales by Wade Schwartz and Penhros Farms.

Reference Sire:

Proficient

Proficient was a performance and phenotypic standout in our 2022 sale. He offers many of the same great attributes as his influential sire with a little more size and extension.

His Pathfinder donor dam was the firstborn daughter of the \$35,000 cornerstone donor EA Bells Girl 2181. With those females as pedigree anchors, we expect the Proficient daughters to be fertile and productive. We calved multiple flush sisters to him this spring, and they have made beautiful wet females with impeccable foot and udder quality.

Proficient was utilized by a number of progressive purebred operations and his sons are slated to be some of the highlights of the spring sale season.

Proficient is owned with Kraye Angus and Jerry Bennett Farms and leased to Beef-360.

Left: EA Bells Girl 2181, the \$35,000 donor granddam of Proficient.

Purchasing herdsires based on the quality of their mother is the most fail-safe method there is to ensure you are progressing your cowherd forward. The donor dam of these three flush brothers would hold a spot on the "Mount Rushmore" of females to have ever lived at our ranch. Coming into her ninth year of life, she is as sound and fertile as ever, with no signs of age or slowing down. They are maternal brothers to the \$65,000 Ellingson Turn Key 0170 and \$20,000 Ellingson Bold. Both have been utilized aggressively in our breeding program. Other maternal brothers are working for Diede Ranch, Ken and Mary Schmidt, Casey and Kyle Wells, Diamond Cross Ranch, Waltman Angus, Elk Meadows Ranch, Tom Kaspari, Casey Schlosser, Landon Davis, Bates Creek Cattle Company, Drew and Callie Johnson, Ottmar Ranch, Ham Ranch and Buford Ranches. A maternal sister was the \$25,000 "pick of the heifer calves" in 2021 and purchased by Eagle Grip Cattle and Abernathy Ranches. She has earned donor status. Another sister, EA Miss Blackbird 0018, is being flushed aggressively here and will have many progeny selling next year. Lots 213-215 are flush brothers.

Lot 213, Ellingson Proficient 3181.

Miss Blackbird 5054, the dam of Lots 213-215.

Dam's Nursing Ratio: 2/101 HP: +12.7 \$M: +82

CLAW: +38 ANGLE: +24

Stacking together the top cow family on the ranch has cemented the prepotent genes in this bull, which should lead to increased predictability and consistency in the calves he sires. His performance measurements tally off the charts, yet he puts that explosive early growth into an optimally sized frame and rancher-friendly body type. He achieves added payweight through tremendous muscle mass and dimension, which is just the route we prefer. His impressive dam is a maternal sister to the \$47,500 Ellingson Open Range, the Pathfinder donor EA Bells Girl 7617 and countless other herd-leading donors. His maternal brother was the selection of Jon Carr in last year's sale.

Ellingson Profound 2022, a maternal brother to Lots 216 and 217.

CLAW: +.25 ANGLE: +.32

Ellingson Proficient 3518 is a stockmen's bull with the balanced-trait EPD package to drive genetic progress forward for nearly any cowherd that makes its living selling pounds of beef and having cows that work for a living. Ellingson Proficient 3518's donor dam by Ellingson Chaps 4095 and maternal granddam by Koupal Advance 28 are two of the most visually impressive females on the entire ranch and accompany those beautiful phenotypes with strong fertility and production. Lot 219's maternal brother by Ellingson Three Rivers 8062 was the \$13,000 selection of Buford Ranches in last year's production sale, while four of his maternal sisters have been retained to work right here in our own cowherd. His Pathfinder donor granddam has posted a production birth ratio of 6/91, a nursing ratio of 6/105, a yearling ratio of 5/107 and a ribeye ratio of 5/103.

EA Bells Girl 7645, a flush sister to the dam of Lots 216 and 217 and maternal sister to the dam of Lot 218.

EA Abigale 6207, the granddam of Lot 219.

CLAW: +.38 ANGLE: +.29

Those in pursuit of bulls produced from some of the longstanding cows of the herd should look closely here. Ellingson Proficient 3119's Pathfinder dam out of the high maternal Everelda Entense cow family and Vermilion Dateline 7078 has a production nursing ratio of 8/105, a yearling ratio of 4/101, a ribeye ratio of 4/104 and a 364-day calving interval. She has multiple daughters working here in our own herd, including one that has achieved the coveted Pathfinder status from the American Angus Association. Maternal brothers are working for Jon Brown, Diamond Cross Ranch and Lower Brule Ranch.

Genex CRI owns Ellingson Homegrown 6035, a maternal brother to Lot 220's granddam. Pictured is Cody Sankey.

Ellingson Profound 8155

S Powerpoint WS 5503

EA Rosetta 6157

Tehama Revere
S Queen Essa 248

Connealy Capitalist 028
EA Rosetta 0038

Profound has become one of the most heavily utilized sires in our ranch history. His sons have been in high demand by progressive commercial cattle producers. They are aggressive breeders and have shown to hold their flesh as well in their first breeding season as any sire group we've ever sold.

The Profounds have explosive early growth, then moderate into optimally sized mature animals – a growth curve designed for real-world profitability. You will appreciate their stock-bull type, high libido, structural correctness and, best of all, consistency.

His dam is a second-generation Pathfinder dam with unbelievable center body mass. His daughters in production look to have the body type and sustained fertility to stick around for many years.

Profound is owned with Peak Dot Ranch and leased to Semex.

Left: Ellingson Preeminent, a Profound son that was the top-selling bull in 2023.

These royally bred flush brothers pair together two of the most commercial-friendly lines of cattle you find in the industry today, Profound and Roughrider. Like you have come to expect from both of these lines, these fall-born brothers are robust in their rib shape and ripped with muscle throughout. They travel with authority on the move and have the stellar foot design and heel depth their sire and his sons have become synonymous with. Their dam by Ellingson Roughrider 4202 is the only full sister in existence to Ellingson Rider Pride 7282, the high-selling bull in our 2018 production sale that was selected by Peak Dot Ranch, Wright Cattle and Van Zee Cattle, and Ellingson Teddy 9369, a top-selling feature in our 2020 sale that was selected by Eaves Angus Genetics and has quietly done a stellar job for them. EA Queen Dolly 9364 is easy keeping. She has a wedge shape, elegant femininity and a true maternal presence. **Lots 222 and 223 are flush brothers.**

Meet the Ellingson Angus team

JACOB ELLINGSON

Our nephew, Jacob, joined us full-time after graduating from Bismarck State College. He is a talented welder, engaged in our farming operations and responsible for hauling hay and feeding cattle at our Sterling ranch.

JAMESON ELLINGSON

Our son, Jameson, works with us full-time, managing our cropping and forage enterprises. He also transports many of our cattle and our customers' feeder and fed cattle to their new homes and oversees the Sterling operation.

STETSON ELLINGSON

Our son, Stetson, is also integral. He knows Angus cattle through and through. He makes most of the mating decisions and handles all registration and DNA work. His wife Brynn works at Mandan Veterinary Clinic.

SEBASTIAN JACOBS

Seb has been a part of our team for more than a decade. He is a hardworking, reliable worker and an integral part of the ranch. He and his wife Nicole have six wonderful children. Dominic was born in June.

KEENAN PIERCE

Keenan joined our team after graduating from Dickinson State in 2021. He takes care of herd health and chores in our development lot. He is married to our daughter, Sierra, and the couple is expecting Baby Boy Pierce in April.

WYATT DAKKEN

Wyatt is a senior at Mandan High School. He joined our regular team this past summer. Fencing is his specialty, and, following the heavy snowfall of Winter '22-23, the year provided many opportunities for him to show off his talents.

BAUER ROGELSTAD

Bauer Rogelstad is helping us through the sale and calving season. The Fergus Falls, Minn., native is a recent North Dakota State University graduate and Brynn Ellingson's younger brother. Before coming to Ellingson Angus, he had been working on a bison ranch.

HOLLY

Our beloved 8-year-old blue heeler is a dedicated Ellingson Angus team member – always up for whatever is on the day's agenda. She especially enjoys chasing cattle, ranger rides and heralding the arrival of ranch visitors.

Koupal Advance 28
EA Primrose 3102

Having quickly drawn the attention of some of America's most prestigious breeding programs, Deep River is seeing use throughout the country. Some of the highlights of this spring's sale season are slated to be Deep River sons.

For those looking to add skeletal size, pounds and carcass merit, his sons should be near the top of your list. You will appreciate the softness and athleticism they possess, even being larger outlined.

It was a no-brainer to incorporate Deep River back into our breeding program, knowing the quality of females that are stacked into his pedigree. His third-generation donor dam has a nursing ratio of 6/103. She is elegant in her kind with femininity, softness and structural correctness.

Deep River is owned with Alta Genetics.

CLAW: +.48 ANGLE: +.46

Produced from one of the most exciting up-and-coming females on the ranch, this Deep River son has been on our watch list since early on in his life. Ellingson Deep River 3265 is built with superb correctness. Being strong topped and standing down true and square to the ground allows him to travel with fluency while on the move. You will be hard-pressed to find another bull with his same moderate birthweight and high CED EPDs that can match his level of natural thickness and muscle expression. Lot 233's S Powerpoint WS 5503 dam will play a major role in our embryo transplant program moving forward. She is unlike any female we have ever worked with, as she has a special combination of antagonistic traits – superior fertility, structural correctness, carcass merit and phenotypic power. Six of the first seven generations of females behind his mother have achieved the coveted Pathfinder designation from the American Angus Association. Two of his maternal sisters have already been retained in our cowherd, with one of them arguably the top female of the entire 2023 calfcrop.

Their Pathfinder donor dam is among the ranks of the best females that graze our pastures. She has recorded a production birth ratio of 4/98, a nursing ratio of 4/106, a yearling ratio of 2/103, an IMF ratio of 5/109 and a ribeye ratio of 5/102 and settled to first-service A.I. every year of her production career. They are maternal brothers to the \$175,000 record-high-seller of our 2022 production sale that sold to ST Genetics, Ellingson Prolific, and the \$67,500 fourth-high-seller in last year's sale that sold to Merit Cattle Company, Arda Farms and MJT Cattle, Ellingson Ignition. Other maternal brothers are working for Roger Aberle, Michael Ball and Jim Petik and Sons. A maternal sister, EA Queen 2318, was the \$30,000 top-selling female at the 2023 Angus at the Congress Sale and is now serving as a donor for Bever Angus and Lott Farms. Lots 237 and 238 are flush brothers.

These dense-muscled Ellingson Deep River sons offer more volume and dimension than you'll find elsewhere. Their Pathfinder dam by Ellingson Transcend 5212 is one of our most prolific embryo producers at Ellingson Angus and has recorded a production nursing ratio of 4/106 and a yearling ratio of 2/104. She is a daughter of Ellingson Transcend 5212, a Pathfinder sire whose daughters are beginning to surface above their contemporaries for production, fertility, correct body type and the structural integrity needed to stick around for years to come. Their donor granddam has a production nursing ratio of 7/108, a yearling ratio of 4/105, an IMF ratio of 4/103 and a ribeye ratio of 4/101. Eleven sisters have been retained to work in our own cowherd, including a sister that has recorded a nursing ratio of 110 on her first two calves. **Lots 241-243 are flush brothers.**

KG Solution 0018
HA Rito Lady 0622

Thedford brings forth exciting new-generation, outcross genetics for our longstanding customers.

His Pathfinder donor dam is one of the most prepotent females in the Angus breed and was our main motivation in utilizing Thedford in our program. She is the mother of numerous herd bulls. Her ability to stand the test of time gives us confidence the Thedford daughters will be productive.

Thedford transmits competitive weaning and yearling performance. His sons are rugged and possess the muscle definition and stoutness you have come to expect when purchasing Ellingson-prefix bulls. They are some of the largest testicled bulls of the offering.

If you are needing to jump-start your weaning and yearling weights, the Thedford sons are a logical place to turn.

We're committed to utilizing bulls bred in our program in mass fashion to build an added degree of predictability in our offering. We incorporate an outcross sire that possesses the same values we prioritize in our own cowherd from time to time with the goal of producing a new-generation herdsire. We feel we have accomplished that feat in this special sale highlight. Lot 253 has ran a strong performance race, even after starting out at a heifer-safe birth-weight. He came off his 2-year-old dam at 940 pounds to earn a 115 weaning ratio. His explosive early growth curve is rooted in strong maternal tradition. His modest-sized Rangeland dam is elegantly designed with superb structural integrity and due back with an early A.I. calf. Her Pathfinder dam is a flush sister to the dam of Badlands, Brickhouse, Preeminent and Progressive. She serves on our donor roster and has a production nursing ratio of 5/109, a yearling ratio of 3/108, an IMF ratio of 5/110 and a ribeye ratio of 5/104. Phenotypically, he may be one of the most impressive and structurally correct bulls we have raised. His outcross pedigree and combination of economically relevant traits make him a definite A.I.-caliber candidate.

Lot 253, Ellingson Thedford 3048.

Cattlemen and women who appreciate pounds that are put into rancher-friendly packages will appreciate the Thedford sire group. They exhibit tremendous muscle mass and shape, are level topped and have added length of spine. Lot 257 came off his dam at an actual weight of 870 pounds and earned a weaning ratio of 108. His genomic profile ranks him amongst the very elite of the Angus population for weaning and yearling weight, scrotal circumference, foot quality, hair shedding, heifer pregnancy, carcass weight and ribeye area. His granddam is a flush sister to the grandmother of Ellingson Three Rivers 8062.

Lot 257, Ellingson Thedford 3111.

EA Emblynette 434, the great-granddam of Lot 257.

The Thedford sire group has commonalities with the Earnan sire group that made them in high demand by progressive commercial cattle ranchers a decade ago. Their same added size, muscle dimension and scale-pounding payweight is a recipe for market-topping steer calves. This Thedford son came off his dam at an actual weight of 890 pounds to turn in a 111 nursing ratio. His angular, easy-fleshing, 2-year-old dam has a near-perfect udder.

"Be a proton. Always positive."

EA Queen Dolly 1051

Rider Pride is one of the longest tenured bulls of our breeding program. Contrary to most, he has gained popularity with age and earned his stripes the old-fashioned way – through progeny proofs.

A son of Roughrider, the popular Genex sire, he offers many of the same qualities, but with more skeletal size, performance and extension. Never before have we seen a bull sire females with such an elegant combination of rib shape, depth of flank, femininity and production presence. They have beautiful udders with adequate milk, breed back, hold their condition and raise some of our heaviest calves. His sons have been well-received. One son, Ellingson Badlands 0285, is one of the most exciting bulls we have bred.

He is owned with VZR Cattle Company, Wright Charolais, JW Cattle and Maher Ranch.

CLAW: +.32 ANGLE: +0.42

Ellingson Rider Pride 2891 is a modest-framed Rider Pride son you will like for his robust body type and superb foot quality. His SAV Resource 1441 donor dam is the best Resource daughter on our ranch. She exhibits an added dose of angularity that matches up with her softness and superb feet and udder. She is a maternal sister to the \$25,000 Ellingson Identity 9104 and carries forward many of the same qualities of her EXT 6106 donor dam. A maternal brother by Profound is an impressive herdsire for Jay and Salena Gullickson, and his influence will be represented in the potload of commercial females they are offering in this very sale.

Ellingson Uncharted,
a maternal brother to Lot 277.

EA Madame Pride 8083,
the dam of Lot 277.

EA Queen Dolly 7059,
the dam of Lot 278.

EA Blackbird 5092 EA Queen Dolly 3246
Koupal Advance 28
EA Blackbird 3086

Left: EA Blackbird 7818,
a maternal sister to
the granddam of Rush.

Rush has become one of the go-to commercial heifer A.I. project bulls of the industry. His ability to sire predictable calving ease, energizing calf vigor, adequate performance and daughters that are second to none make him a perfect fit for ranch country.

He is backed by eternal cow power—with three consecutive generations of Pathfinder dams that align his bottom side. The first Rush daughters are ultra-feminine with a soft, maternal presence.

This first offering of Rush sons is impressive. They are consistent from the first to the last. They have the same sharp front end, striking profile and depth of side and flank that made their sire great.

Covering females in the breeding pasture, Rush shows tremendous libido. We expect the same level of optimism from his sons.

He is owned with Genex CRI.

a Powerpoint son that is a
herdsire for Peak Dot Ranch.**

S Powerpoint WS 5503 has made an enormous impact on the trajectory of our program. His son, Ellingson Profound 8155, is the heaviest utilized sire in our ranch's history. Numerous grandsons have now carried on the torch and are gaining notoriety.

Unmatched in his ability to drive muscle, stoutness and marbling, Powerpoint defied nature. Now as a high-accuracy sire, he has proven his potency to pass on that unique pairing of genes.

Maintaining his flesh with ease, he was the type of bull a person had to put on a diet even when on forage alone. He remained an active breeder in the pasture past eight years of age.

We own Powerpoint with Spickler Ranch North and ST Genetics.

Ellingson Powerpoint 2896 is a powerhouse fall-born bull with the added shape and natural thickness we strive to breed into every bull. His dam is a maternal sister to the \$27,500 Ellingson Chaps 4095, one of the highest customer-satisfaction sires to have ever been produced at the ranch. She has recorded a production birth ratio of 3/99, a nursing ratio of 3/104 and a yearling ratio of 2/101. His Pathfinder granddam is still in production at 14 years of age. A maternal brother was selected by Tyler Messner in our 2021 sale.

This bull is out of what we consider to be one of the best up-and-coming cows on the ranch. She is a flush sister to the \$65,000 Ellingson Turn Key 0170 and will have a large volume of embryo calves born at the ranch this spring. She is a second-generation donor and has a production birth ratio of 2/100, a nursing ratio of 2/107 and a yearling ratio of 1/107. She is due back for a first-service A.I. calf. His flush sisters rank among the very best females in our replacement pen, which should foreshadow what could become of his own daughters. He is a full brother in blood to Lot 319.

Lot 321, Ellingson Pilot 3390.

Lot 323 is a sale headliner. He has a potent gene set ideal for passing along competitive performance and superior cow-making traits. He is soft middle, smooth profiling and sound traveling with a striking presence. His dam is a maternal sister to Ellingson High Plains, a special feature in last year's sale that sold to Rust Mountain View Ranch and Tim and Kathy Meyer. His granddam is on track to earn the Pathfinder award when they are presented in late January. She has recorded a production nursing ratio of 3/110, a yearling ratio of 2/106 and a 362-day calving interval, having settled to first-service A.I. every year of her production career. His genetic potential should qualify him for utilization beyond the breeding pasture.

EA Bells Girl 7645, the dam of Lots 324 and 325 and a flush sister to the dams of Lots 326-330.

Here is an unique breeding piece that blends power with high-level carcass merit. Ellingson Pilot 3143 presents extraordinary length of body, base width and payweight. He earned a weaning ratio of 105 after coming off his dam last fall. Stacking together the proven Bells Girl cow family with the maternal potency of his sire's pedigree is something that can only be found at Ellingson Angus. His outcross pedigree offers a new and exciting opportunity for our longtime customers.

Deep sided and assembled with more pounds of red meat, these five flush brothers will sire heavy feeder calves and daughters that keep you in the business for the long haul. Their Pathfinder dam is one of our most prolific embryo producers and earned a production nursing ratio of 4/106 and a yearling ratio of 2/104. She is a daughter of Ellingson Transcend 5212, the Pathfinder sire whose daughters are beginning to surface above their contemporaries for production, fertility, correct body type and structural integrity. Their donor granddam has a production nursing ratio of 7/108, a yearling ratio of 4/105, an IMF ratio of 4/103 and a ribeye ratio of 4/101. Eleven sisters have been retained to work in our cowherd, including a maternal sister that is Stetson's favorite in the bred heifer pen and another that records a nursing ratio of 110 on her first two calves. Maternal brothers sell in this sale as Lots 27-33 and 241-243. Lots 336-340 are flush brothers.

Produced from one of the most visually appealing cows at Ellingson Angus, these three flush brothers' Koupal Juneau 797 dam is a third-generation donor cow. EA Lucy 8164 traces back to EA Lucy 141, a cornerstone matriarch for our program and the dam of LT Territory 5824 of EA, a popular Pathfinder sire. These embryo transplant bulls have superior fertility, udder quality and growth traits stacked into their DNA. All three brothers are safe for the utilization on virgin heifers. Their maternal brothers have been selected by Dave and Greg Wanner and Buford Ranches in our past production sales. Lots 341-343 are flush brothers.

CLAW: +.44 ANGLE: +.42

Ellingson Pilot 3786 is a moderate-framed, expressively muscled Pilot son. His Pathfinder dam posted a production nursing ratio of 9/102, a yearling ratio of 6/103, an IMF ratio of 8/111, a ribeye ratio of 8/101 and a 366-day calving interval, even while being flushed. Kelly and Renee Froelich, Retterath Ranch, Gottsch Cattle Company, Buford Ranches, Diede Ranch and Lower Brule Ranch own maternal brothers. A maternal sister is the dam of Lot 345 and is a top-level donor that will be playing a major role in our embryo transplant program.

EA Lucy 2218,
the great-granddam of Lots 341-343.

Kelly Froelich (left) and Justin Retterath own brothers to Lot 344.

CLAW: +.39 ANGLE: +.57

Make sure to keep every female from Lot 345. His sire's type and kind matched with the females that anchor the bottomside of his pedigree create a recipe for long-lasting, productive females. Six of the first seven generations of females behind Lot 345's dam have achieved Pathfinder status. Two sisters have been retained in our cowherd. A flush sister is likely the top heifer of the 2023 calfcrop.

Ellingson Roughrider 9026,
a maternal brother to Lot 344 and to the dam of Lot 345.

Left: EA Queen Dolly 3246,
the donor dam of Empire.

A \$25,000 top-selling feature of our 2021 sale, Empire was dubbed by many as one of the most phenotypically dominant individuals of the offering.

The Empire sons are powerfully constructed, with the robust rib capacity and natural thickness that we strive for. They have high-octane growth and competed with the best of their performance class.

His dam is one of the most well-known females in the history of our program. She has produced numerous herdsire sons, including Ellingson Rider Pride 7282, Ellingson Three Forks 0252, Ellingson Teddy 9369, Ellingson Fortified and Ellingson Blockade. She continues to be a functional producer at 11 years of age.

A maternal brother by Prolific is one of the highlights of this offering, selling as Lot 19.

LT Territory 5824 of EA

EA Rosetta 8825

Verified was a phenotypic and performance standout in our 2020 production sale. He has added size, length of body and muscle shape in a rugged build. In the pasture, he is an aggressive breeder.

His donor dam is a direct daughter of the Pathfinder sire LT Territory 5824 of EA, whose daughters have been acclaimed as some of the most productive and impressive dams to have ever walked our pastures. She serves as a donor for Ingram Angus. With her anchoring a pedigree, we expect the Verified daughters to be top notch.

His maternal brother, Ellingson Forage Converter, has been heavily utilized in commercial heifer A.I. projects. The Forage Converter daughters have made excellent brood cows.

He is owned with Ingram Angus and Genex CRI.

We have now offered sons of Deer Valley Growth Fund in three consecutive sales. They have been well-accepted by commercial ranchers who get compensated by the pound.

You won't catch this crew in sparkles and suit coats most days, but the Ellingson Angus team and their guests got shined up and had a fun time celebrating the season and supporting the North Dakota Stockmen's Foundation's charitable mission in December. Pictured are (back, L to R) Sebastian Jacobs, Jacob Ellingson, Morgan Hedstrom, Sierra Pierce, Kendryn Bullinger, Julie Ellingson, Brynn Ellingson, Wyatt Dakken, (front) Nicole Jacobs, Medora Ellingson, Keenan Pierce, Jameson Ellingson, Chad Ellingson, Stetson Ellingson and Sheridan Ellingson.

FEATURE YOUNG SIRE: *Preeminent*

Ellingson Preeminent was the lead-off and \$110,000 high-selling bull of our sale last year. Phenotypically, he is one of the most balanced bulls we have ever raised. Preeminent will play a major role in our breeding program moving forward.

He is owned with Hollow Top Angus.

FEATURE YOUNG SIRE: *Statement*

Statement was the headlining calving-ease bull in our 2023 sale. He offers an ideal birthweight – not too big nor too little – in tandem with high calving ease to be a sire commercial ranches can be utilizing on their heifers.

He is owned with Barnes Ranch and Little Goose Ranch.

Commercial Females

FROM THE HEART OF OUR CUSTOMERS' HERDS

We're excited to include a commercial female division in our sale to showcase some of the producers who have an Ellingson Angus bull battery. These cattle are broody, feminine, replacement-quality females from herds that have long histories of producing profit-oriented cattle. The females are bangs vaccinated and dewormed and have had three rounds of modified-live vaccination. The bred heifers have also all had their ScourGuard vaccine. The bred heifers will be available for viewing at Ellingson Angus beginning Feb. 1. The open heifers will not be on site. Videos of all the commercial heifers can be seen on DVAuction and Northern Video. Contact us, the consigning producers or Pat Maher or Alan Heim, commercial marketing representatives, for more information about the heifers or the individual programs.

Alan Heim,
Commercial
Marketing,
(701) 400-2564

370-519

Diede Ranch, Richardton, ND

150 HEIFER CALVES:

These heifers are the rancher's kind. They are easy-fleshing females that will make profitable cows. Their dams are known for weaning big calves without being pampered. Their cowherd has been rigorously culled in a disciplined fashion for many generations. Their steermates have consistently topped the market and have an unblemished reputation in the feedlot. The heifers are sired by sons of Fundamental, Chaps, Roughrider and Rainmaker. Dienes purchase only top-end bulls and have utilized A.I. for many years. Their cowherd is built upon strong maternal sires like Roughrider, Resource, Bandwagon, Earnan and Territory.

Clint & Heather Diede, Richardton:
(701) 878-4201

520-594

Gullickson Ranch, Cannon Ball, ND

75 HEIFER CALVES:

The Gullickson Ranch heifers are one of the top performance sets you will find anywhere. The Gullickson family places a strong emphasis on cattle that can do it all. They always select stout, eye-appealing bulls that are top contemporary performers and, most importantly, out of good mothers. They sell some of the heaviest steers in the Dakotas and draw in lots of feeder interest. The heifers are sired by sons of Roughrider, Profound and Three Rivers. Their cowherd is influenced by strong maternal sires like Roughrider, Earnan, 004 and Net Worth.

Jay & Salena Gullickson, Cannon Ball:
(701) 471-2439

595-744

Schmidt Ranch, Solen, ND

150 HEIFER CALVES:

The Schmidt Ranch has a long, proud tradition of raising top-quality feeder cattle and replacement females. Ken and Mary Schmidt and their family are actively involved in all aspects of the beef cattle industry – from the cow-calf sector to the feeding sector. Their heifers are sired by sons of Roughrider, Rider Pride, Powerpoint, Transcend, America and Torque. Their cowherd is heavily influenced by Roughrider and Resource.

Ken & Mary Schmidt, Solen: (701) 220-7407

Travis & Stephanie Schmidt, Solen: (701) 220-7910

John & Amy Lord, Solen: (701) 226-3408

745-819

Roseland Ranch, Seneca, SD

75 HEIFER CALVES:

Roseland Ranch is offering a group of heifers for the second time to our sale. We have helped market their females for multiple years with excellent customer satisfaction. They have went to progressive producers in Texas, Kansas, Iowa and North Dakota in the past. The freight on these heifers will be less for anyone needing females from the south or east, since they are located in east central South Dakota. The Roselands are progressive producers, always selling backgrounded steers weighing 800-plus pounds in December. They buy top bulls for their commercial herd, even owning A.I. stud bulls which they breed hundreds of cows to each year. A recent purchase was Ellingson Brickhouse. The heifers are sired by sons of Authorize and Rider Pride. Their cowherd is rooted in Roughrider, Resource and Earnan.

Sal & Kelly Roseland, Seneca, SD:
(605) 216-2436

820-894

Hinsz Ranch, McLaughlin, SD

75 HEIFER CALVES:

Shawn and Jayne Hinsz and their young sons are progressive cattle producers who ranch right on the border of North and South Dakota.

They run a large number of cows with a limited workforce, so the cows must be quite self-sufficient. The Hinsz family sold their feeder calves on the Northern Video Auction the past few summers, and their calves have garnered some of the top prices of the sale both years. The heifers are mainly sired by Dakota, Fundamental and Rider Pride sons, while their cowherd is backed by Juneau, Homegrown and Remedy sire lines.

Shawn & Jayne Hinsz, McLaughlin, SD:
(605) 848-0444

895-1019

Dolezal Ranch, Dunn Center, ND

75 HEIFER CALVES AND 50 BRED HEIFERS:

The Dolezal family has a long-established herd with a focus of using multiple sons from a sire group to capture maximum consistency. They always have an impressive set of feeder calves that are extremely even from top to bottom when we help ship their steers each fall. These females will be bred for fertility and longevity, while still maintaining good performance genetics. These heifers are sired by Barricade, Rainmaker and Profound sons, with the cowherd being backed by Roughrider, Homestead and Powerpoint lineage. The bred heifers will be confirmed bred to the A.I. sire Ellingson Rush. They are due March 18.

Shane & Sheralee Dolezal, Dunn Center:
(701) 290-0944

1020-1158

Katus X7 Ranch, Watauga, SD

139 BRED HEIFERS:

The Katus family has a long tradition of selling top-quality bred heifers. These heifers come from the heart of their and the Ham Ranch herds. Both

cowherds have been developed for generations on almost exclusively Ellingson Angus genetics. They are sired by top sons of Roughrider, Powerpoint and Homegrown. These are heifers that will be self-sufficient and wean big calves. Both families know the value of good genetics. Eighty-nine heifers are direct daughters of Ellingson Three Rivers from Hams. Forty-seven are A.I. bred to Ellingson Badlands 0285 and are due to calve March 5-8. Twenty-one head are naturally bred to Badlands sons and are due to calve March 9-20. Thirteen head are naturally bred to Badlands sons and are due to calve March 21 through April 12. Eight head are naturally bred to Badlands sons and are due to calve April 15-25. Fifty head from Katuses and Hams are A.I. bred to Badlands and are due to calve March 5-8.

Scott & Heather Katus, Watauga, SD:
(701) 455-3715

The Angus advantage starts with the incredible Angus female. Her strong maternal instincts, superior milking capabilities, high fertility rate and moderate size create an ideal mother.

ELLINGSON ANGUS: A PROGRAM THAT EXTENDS BEYOND JUST SELLING YOU A BULL

Commercial Marketing Programs

Maternal Strength & Marketing

Ellingson Angus has been enrolled in the American Angus Association's MaternalPlus™ program for six years. MaternalPlus™ is geared for Angus breeders focused on improving fertility, longevity, cow production and cow efficiency. We have used this data to produce superior maternal genetics for our valued commercial customers.

We proudly showcase many of these maternal genetics by marketing numerous longtime customers' females in our production sale and through various other avenues, including the Maternal Solutions program.

For more details, call Chad Ellingson
at (701) 445-7309 or (701) 361-3606.

Our goal is to improve your profitability
through superior genetics and strategic marketing.

Feeder Cattle Marketing

Ellingson-sired feeder calves are in strong demand throughout the feeding industry. We help facilitate the marketing of thousands of our customers' calves each year. The Ellingson-influenced feeder calf selling at the auction market, video sale or by private treaty is recognized by feeders as a premium animal.

We also offer some unique opportunities and premiums for GAP- or VNB-certified cattle for our customers who raise natural calves.

ARE YOU BUYING BULLS FROM A *True Maternal Herd?*

Many bull suppliers today like to tout themselves as distinguished breeders of maternal genetics without the commitment to measuring it. It would be the same as breeding for performance without collecting weaning and yearling weights. We believe maternal function is quantified by a combination of both the tangibles and intangibles. Our definition of “maternal” reaches a lot farther than just an easy-fleshing cow that is good to look at.

At Ellingson Angus, we are committed to producing bulls that will sire practical and problem-free females.

“Our definition of ‘maternal’ reaches a lot farther than just an easy-fleshing cow that is good to look at.”

Over the past six years, to ensure we are providing superior maternal genetics, we have taken a two-faceted approach to identify cows and cow lines worthy of propagation or elimination. The two facets are data collection and submission through MaternalPlus™ and using cowboy logic for the immeasurable.

To make headway in progressing maternally relevant traits forward, we are relying heavily on both facets of data to make breeding decisions – and even more on them for making culling decisions. We have zero-tolerance for any cows that fail to meet our criteria for any of the maternal traits we measure. If they fail, they are automatically disqualified from receiving another opportunity to breed and are shipped as a cull.

We have earned the MaternalPlus™ designation by meeting the national inventory reporting requirements, plus more. MaternalPlus™ provides us and you the information needed to make effective selection decisions. This voluntary designation is designed to capture additional reproductive trait data and, ultimately, expand reproductive and cow survivability tools. We are one of only a few breeders in the state that have taken this important step, because we know how critical it is for our customers’ profitability.

What data are we collecting and submitting to build the maternal EPDs at the American Angus Association?

1) Udder Suspension and Teat Size

Udder suspension and teat size are critical for newborn calves to receive colostrum in a timely manner. How quickly a calf nurses for the first time is significant to its future health and performance. Every cow is scored annually for udder suspension and teat size.

2) Claw and Angle

Foot quality is vital to the longevity and long-term productivity of a beef animal. Every cow is scored annually for claw set and foot angle.

3) Heifer Pregnancy and Cow Fertility

Cattle reproduction is the largest economic driver of turning a profit in the cow-calf business. We are continuously applying more selection pressure on our cowherd by mostly retaining only cows that conceive in the first two cycles of the breeding season. All cow and heifer breeding data and ultrasound results are submitted annually.

4) Docility

Like any other trait, we believe there is an optimum range for the docility level of cattle to make superior maternal females. Identifying and culling animals that are on both sides of the extreme and keeping the ones that fall in the middle is our goal. Cows that are mean and flighty are unacceptable, as they make things unsafe. Cows that fall short in mothering ability and require extra attention to get their calf up and going are not desirable either. All cattle on our ranch are scored for docility as yearlings.

What are the immeasurable components of maternal function we utilize cowboy logic to track?

1) Mothering Ability

We neither have the time nor the want to do a cow's job for her when she calves, and we understand our customers don't either. We have a zero-tolerance policy for cows that choose not to get their calves up and going immediately after they calve, whether that's mulling

or walking away from them or anything in between. Those cows no longer get the opportunity to breed here.

2) Calf Vigor

Inevitably, calves that lack vigor and need assistance at birth are the ones that reappear with another problem down the road and need an expensive intervention. Calves that fail to receive colostrum in a timely manner – many times due to a lack of vigor – never realize their full genetic potential. We have made a concerted effort to track the level of calf vigor from different sire lines and females in hopes that we are creating bulls that will sire calves that are up and going within the first 10 minutes of life.

3) Fleshing Ability

Propagating genetics that easily hold their flesh through all phases of the year is a focus of ours. Like most of our commercial clients, we expect our cowherd to forage and be self-sufficient without supplementation well into the winter. Upon weaning our heifer calves each year in mid-September, they are turned back to native grass alone generally through the early part of December. We utilize this period as a selection pressure to pinpoint females that won't make the cut.

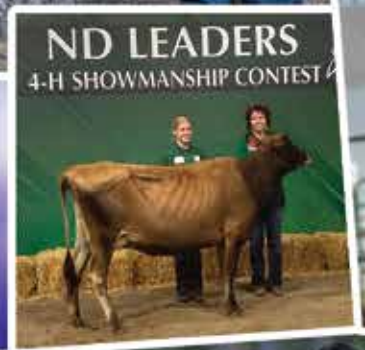

4) Physical Analysis

Phenotype can be a valuable tool as a genetic predictor in many things performance related. We think it has just as much validity in predicting things maternal, like milking ability, fertility and, of course, mature size. When selecting females to retain as replacements for our cowherd, a wedge-shaped, feminine design is a must. •

Sale Managed By

RANCE LONG, INC

918.510.3464 cell
rlong@rancelong.com
www.rancelong.com

Welcome to the 2024 Real-World Genetics Production Sale for Ellingson Angus. Each year, this reputation family program has one of the breed's most anticipated spring bull sales. This year will be no exception! The Ellingson family takes great pride in being a genetic supplier to many of the breed's top commercial programs, as well as supplying elite herdsires to purebred programs throughout the world. The Ellingsons are committed to breeding superior Angus cattle and realize the genetic power these bulls offer will ultimately add value to their customers' bottomline. Each year, the seats are filled with repeat customers throughout the cattle industry because they know the practical, real-world expertise that goes into every mating decision has their best interests in mind.

In addition to the incredible bull offering, there will be more than 800 head of commercial females selling – including heavy spring-bred heifers and fancy yearling replacements! The commercial female offering is always rich in quality, and this set is no exception. As we look into 2024 and beyond, these females will be an asset!

The cow power at Ellingson Angus is without a doubt as good as you will find in the Angus breed! This MaternalPlus cowherd is one that visitors throughout the world enjoy the opportunity to see. The cowherd is simply impressive in terms of power, mass and all the functional traits that cattlemen appreciate! To make big-time herdsires, it takes a cowherd developed to perform efficiently in the harshest of environments – and this cowherd is superior!

Ellingson Angus herdsires are having an impact throughout the industry and seeing heavy use in leading programs nationwide. When breeders sort the Angus database for growth, performance and elite foot quality, Ellingson-bred bulls always surface. The list of leading A.I. sires from Ellingson Angus continues to grow each year, with A.I. studs and purebred programs investing in these front-end Ellingson bulls. Several of these leading A.I. sires will have large sire groups selling this year, including 68 sons of Ellingson Badlands, 42 sons of Ellingson Turn Key, 31 sons of Ellingson Three Rivers and 25 sons of Ellingson Prolific.

This offering of bulls will allow cattlemen to select from large contemporary groups. Also included will be many bulls produced from the E.T. program. From flush brothers to maternal brothers, the genetics will be uniform. Genetically and phenotypically, these bulls impress – from the first pen to the last pen. For producers looking to add pure power and performance, Ellingson genetics will do that and more!

2024 has all of us looking into the future with a great deal of optimism. Our future is exciting, and we appear to be in a position few of us have ever dreamed of seeing. Successful cattlemen know the meaning of genetic power and the value those genetics can have on their bottomline. As we look beyond 2024, it will be the producers who invest in the right kind of genetics today – from trusted programs – who will be selling market-topping calves in the years ahead! The Ellingson family is committed to being your genetic supplier, and they value the relationships they have with their customers they call friends!

We look forward to seeing you in St. Anthony, N.D., on Feb. 3, 2024, for the much-anticipated Ellingson Angus Sale. If I can assist in any way, please don't hesitate to give me a call at (918) 510-3464.

Sincerely, *Rance Long*
